

## GoogleDocumentBrief

The project *We'll see how it goes* focuses on coming up with assignments and presenting them in a new form.

This assignment was designed specifically for the online exhibition of BHSAD Graphic Design Students. The completion of the assignment is happening live in this Google Document.

### The assignment:

- You are to make a poster using only the tools available in this program(it's not a program). bitch
- The finished poster must consist of text (borrowed or written) and graphics (borrowed or drawn).
- People participating must communicate with each other in the chat section via written text and group into two teams: text generation and generation of visuals.
- After the content is generated, the group responsible for visuals would have to typeset the text, and the group which came up with text would be responsible for the overall layout.

wait where's the chat? scroll ah yeah right soz

### Notes from the author:

- ❖ Take some time to get to know the program and its possibilities.
- ❖ During the whole process I will be here monitoring the process.
- ❖ Ask questions in the chat and make sure to specify to whom the question is addressed (I suggest choosing a color that would represent you, while communicating in the chat).
- ❖ Good luck and don't stress about it too much, it is an experimental collaborative exercise, there is no right or wrong decision.

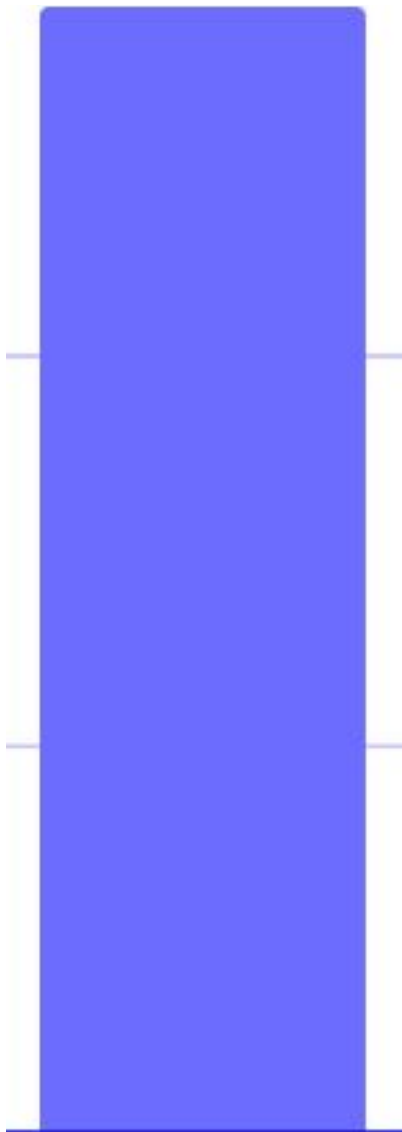

In the long sunny afternoon,  
The plain was full of ghosts,  
I wandered up, I wandered down,  
Beset by pensive hosts.

"Come hither, Fool."

The Fool jingled miserably across the floor.

*“Come hither,*

*Fool.”*

Chat:

hello ladies and welcome this is your host and guide

So we're making one poster, right?

yeah

do you wanna be responsible for the text or the visuals?

Either is fine with me tbh

ok then i'll find/make the image/s

lesya, if we're only using google docs where can i borrow images from?

you found a loophole (possibly my mistake in agreeing with seb)

stick to this brief for now (you can google search the images or draw them) ill fix staff later

Ok dumb question, but you want us to assemble the poster here as well or?

yes, third page

also you could add pages if you ran out

is it ok if my image has text?..

i guess question mainly to Maria

Yeah sure!

fine with me

cewl then i'm ready

should we start assembling?

Hold up, found a better text LMAO

SCREAMING

i am gagging

Heheheheeh I'm taking that we're using this one then, yeah?

lets do it yeah

Werk 🤪

you can use more than one (applied to images as well)

i think we're good

so overall layout is on you? wanna start?

Oui

Gimme a sec and I'll try to outline some stuff lol

Can you send me the image somewhere else? Can't seem to copy paste it properly maybe try dragging it?

double tap it and you'll be able to edit the size etc  
but it might not be possible to play around with it so easily cause i think google docs  
thinks it's an intext element and not an image

YEah I noticed haha

sorrriyyyyy 🙄

I figured it out! Just need to use the "wrap text" option

woooah

she pink

just tryna figure out our options

Alriiiight you can just do whatever else you want to with the text I guess

\*nat left the chat\* (literally it seems like)

nat? @

n

am i here

alone..... this is highkey sad

No no no, I'm still here lol

where is she? do i break the rules and @ her in vk.....

Uhh idk

fuck i'm sorry!!!!

i got a groceries delivery and was sanitizing all that shit

Yass kween

soooorrrriyyyyy

but i'm bacc

lol there's literally no place left for the text hahah

Figure it out 🤡🤡🤡

You can try to go over the images too, I think

Like there should be a way idk

Im sorry for such a pain in the ass brief)))

ok i'm done lol

what a masterpiece

LOVE IT!!!

i demand a printed copy

WILL BE DONE

heyooo congratulations ladies!!

and THANK YOU

YOU ARE MY HEROS

anything to not work on my fmp

i see

anything not to work on all the things I need to do lol

anyways lets consider it a win win situation
